In this work. proposed a unified theory of dark matter and dark energy. it is non-representation of the theory may well explain the phenomenon of dark matter and dark energy. This book not only presents and summarizes many of the new theories and new results. and mature way directed at the nature of the representations and introduce relevant parties theories and concepts. From a mathematical point of view to see the physical world - geometric analysis of the gravitational field and relativistic suitable for senior undergraduate mathematics. theoretical physics. astrophysics. and other professional and graduate students. teaching and research staff. both as a textbook for graduate students in related fields. but also as a research reference.
